

AMENDMENTS TO ABSTRACT

A method for ~~selecting to activate~~ selectively activating a personal digital assistant (PDA) or mobile phone in an electronic device ~~is disclosed. The~~ makes use of a device ~~is operable to select to~~ selectively activate a PDA or mobile phone. When the device is enabled, the user can select to activate either the PDA or mobile phone through a menu. Thus, a desired PDA or mobile phone is activated for use after the selection. By utilizing this, the user may select to activate the PDA or mobile phone in the device, thereby preventing ~~from violating~~ violation of flight safety rules by unintentionally turning on the mobile phone while taking an airplane. Further, such option can greatly enhance the adaptability of the electronic device, thus attracting more people to use it.
